Core business areas

Alpha Real Capital LLP is an international co-investing fund management group.

Established in 2005, and headquartered in London, Alpha comprises an international network of offices in the UK, Europe and Asia. A 100+ strong professional team, combining experience and expertise with research, analysis and market knowledge, operates through 10 platforms, across diversified investment markets, offering listed and unlisted property vehicles, open and closed-ended property vehicles, and UK and international funds, products and wealth management services. Alpha engages with institutional investors, family offices, wealth managers and professional advisers / IFAs, as well as UHNW, HNW and private investors.

TIME Investments is the authorised wealth management and investment services arm of Alpha. TIME specialises in ground rent and other 'long income' property funds (having acquired the real estate asset management business of Close Brothers Group in 2011), Inheritance Tax Services, including Business Relief (BR), and investment services, including Enterprise Investment Schemes (EIS).

Tempo Structured Products is a new Alpha platform, with four areas of focus: i) Retail: focusing on straightforward, lower risk structured products, for distribution through TIME Investments to UK Professional Advisers (IFAs and wealth managers); ii) Institutions / Pension funds: working with institutions / pension fund consultants, to develop 'smart structured products' (fusing structured, passive and smart beta strategies together); iii) HNW / UHNW / Family Offices: working with Alpha contacts to design bespoke structured product solutions for Family Offices, UHNW and HNW Individuals; iv) Strategic Alliances: partnering with other institutions, offering our expertise and issuer relationships as a specialist structured products unit, for the benefit of their clients and customers.

- **As part of Alpha Real Capital, our philosophy, approach and USPs are founded upon a commitment to straightforward, lower risk products, underpinned by operational strength and robust governance, presented with transparency and integrity, with exemplary support and service for professional advisers / investors**
- **At the heart of our approach our aim is to be known for straightforward, lower risk products and ‘doing the right things - and doing simple well’:**
 - providing professional advisers and their clients with a high calibre structured product provider, a carefully considered approach to structured products and a level of support and service that they can be genuinely confident in
- **Our entire emphasis is on working closely with professional advisers to advance and enhance the value that can be gained from structured products, for the benefit of their clients**

- **Issuer / counterparty risk is the most fundamental risk of structured products:**
 - both the potential returns of a structured product and the repayment of capital usually depend upon the financial stability of the issuer / counterparty throughout the investment term
- **So, we think it's straightforward - and important - to state the obvious: *professional advisers and investors should seek to identify structured products backed by strong issuers / counterparties***
- **There are a number of metrics that are widely considered relevant in identifying and assessing the financial strength / credit risk of a prospective issuer / counterparty (our Academy 'Module 4: Issuer / Counterparty due diligence' explains credit ratings, CDS and fundamentals, etc.)**
- **Generally speaking, we think the UK retail structured products sector and professional advisers have 'upped their game' over recent years, since the global financial crisis:**
 - there is reasonable knowledge of and attention paid to credit ratings
 - there is some knowledge and awareness of credit default swap (CDS) spread levels
 - and there is some - albeit less - knowledge and consideration of 'fundamentals' (Tier 1 capital ratios, etc.)
- **But, we also think some complacency may have crept in, over the years: and that more could and should be done by the sector's providers to prompt professional advisers to carefully consider this critical aspect of structured products and to support them in their research and due diligence:**
 - the importance of this aspect of adviser due diligence should still be considered absolutely key

- Professional advisers are expected to undertake robust issuer / counterparty due diligence
- The regulatory expectations incumbent upon professional advisers are explicit - the following extracts are taken from the FCA Retail Product Development and Governance: Structured Product Review, 2012 Thematic Review:

“Firms should carry out sufficient due diligence into the counterparty and not rely solely on credit rating agencies ...”

“We expect firms to look more broadly than just the credit rating, such as the rating, outlook, credit default swap (CDS) spreads and other market information, as well as ‘fundamentals’ on the issuer’s balance sheet.”

- **Our approach as an independent Plan Manager, able to select and deal with issuers / counterparties without bias, is that we seek to identify and deal with strong issuers / counterparties**
- **The FT Banker Database identifies approximately 3,400 banks globally. As a first step, we have chosen to deal with banking groups that are regulatorily categorised as ‘Global Systemically Important Banks’ (G-SIBs) and / or, as a minimum, ‘Domestic Systemically Important Banks’ (D-SIBs):**
 - as the name details, G-SIBs / are fundamentally the more important (and usually the bigger, deeper and stronger) banking groups, globally, regionally
 - as a result, they are subject to *higher supervisory expectations*, including for risk management, risk governance and internal controls; and capital adequacy requirements, including higher Tier 1 capital ratios and further incoming rules regarding Total Loss Absorbency Capacity (TLAC)
 - it’s hard to argue with the rationale of recognising G-SIBs as bigger / stronger banking groups
 - however, simply having G-SIB, or D-SIB, status is not sufficient for us to engage with any / all of the G-SIBs or D-SIBs
- **As a second step, we have developed a suite of proprietary ‘Scorecards’ that help us analyse, assess, compare, consider and understand prospective issuer / counterparties within the banks universe:**
 - for full details of our Scorecards, please see our ‘Introduction and overview’ and ‘Methodology: scoring and weighting’ presentation packs

We explain our methodology: but support other views / interests ... TEMPO STRUCTURED PRODUCTS

- **The weightings we have applied to our Scorecards reflect our views of the relative importance of the categories factors in assessing and considering issuer / counterparty financial strength / credit risk:**
 - but we highlight that we can readily support professional advisers who may have different views and / or want to apply or explore different weightings

- **We developed our Scorecards for internal purposes: as part of our process of considering and selecting issuers and counterparties. We publish our Scorecards as part of our approach to providing transparency - and to support professional advisers in their research and due diligence responsibilities:**
 - but it is important that professional advisers using them understand what they are and what they are not
- **WHAT THEY ARE: the primary purpose of our scorecards is to compile multiple factors that potentially measure or indicate financial strength / credit risk, with a scoring system that provokes and supports more objective and detailed analysis, assessment, comparison, consideration and understanding of prospective issuers and counterparties**
- **WHAT THEY ARE NOT: the scoring system ranks the issuers and counterparties, but it is important that professional advisers understand that this is NOT their intended purpose:**
 - *the purpose of our scorecards, including the rankings, and multiple data points, at an amalgamated, category and factor level, is to provoke and support **analysis, assessment and comparison** of the data, to aid more objective **consideration** and **understanding** of relative issuer / counterparty financial strength / credit risk*
- **It is also important that professional advisers understand that our Scorecards are not independent research or an investment recommendation:**
 - we do not provide any warranty regarding the data, methodology, scores or rankings: and we expressly exclude any liability for any judgement or interpretation based upon or influenced by our Scorecards
 - professional advisers should reach their own judgement of issuer / counterparty financial strength / credit risk

A : ANALYSIS

A : ASSESSMENT

C : COMPARISON

C : CONSIDERATION

U : *AND UNDERSTANDING*

- Our Scorecards are NOT about the rankings per se. All of the issuers / counterparties (with one or two exceptions) are strong banks, in the top percentile (based on criteria we assess) of the banking universe:
 - our Scorecards are designed to provoke and support **analysis** and **assessment** of the data, including **comparison** and **consideration**, leading to better **understanding** of prospective issuers and counterparties

- **Professional advisers are expected to undertake robust issuer / counterparty due diligence**

“Firms should carry out sufficient due diligence into the counterparty and not rely solely on credit rating agencies ...”

“We expect firms to look more broadly than just the credit rating, such as the rating, outlook, credit default swap (CDS) spreads and other market information, as well as ‘fundamentals’ on the issuer’s balance sheet.”

- **Our Scorecards provide easy access to multiple, widely recognised measures and indicators of financial strength / credit risk:**

- that can help provoke and support detailed and more objective analysis, assessment, comparison, consideration and understanding of prospective issuers and counterparties, as part of product research and due diligence

- **Importantly, however, professional advisers should note our explanation of what our Scorecards are and what they are not - including understand that our Scorecards were developed for internal purposes, with a scoring system and weightings that we feel are appropriate:**

- and we highlight that we can readily support professional advisers who may have different views and / or want to apply or explore different weightings

- **Issuer / counterparty risk is the most fundamental risk of structured products**
- **Our Tempo Issuer & Counterparty Scorecards have been developed for internal purposes, to aid more objective due diligence consideration and selection (or rejection) of prospective issuers / counterparties:**
 - based on the criteria that we assess, the banks that we monitor are (with one or two exceptions) in the top percentile of the global banking universe (of circa 3,400 banks)
 - our Scorecards are designed to help provoke and support detailed **analysis, assessment, comparison, consideration** and **understanding** of issuers / counterparties, based upon multiple factors that are widely recognised measures / indicators of financial strength / credit risk
- **We publish our Scorecards as part of our approach to proactively providing transparency with regard to the processes behind our products:**
 - and to support professional advisers in their product research and issuer / counterparty due diligence
- **We explain our methodology and the weightings we use for internal purposes - having given considerable thought to how to combine, balance and reflect our views of the relative importance of the factors:**
 - importantly, we highlight what our Scorecards are: and what they are not
- **We feel strongly that prompting professional advisers to carefully consider this essential aspect of structured products, supporting their research due diligence, is the right thing to be doing and a significant positive**

- **It should always be understood that:**
 - structured products are not suitable for everyone
 - past performance is not a reliable indicator of or guide to future performance and should not be relied upon, particularly in isolation
 - the value of investments and the income from them can go down as well as up
 - the value of structured products may be affected by the price of their underlying investments
 - capital is at risk and investors could lose some or all of their capital

- **The ‘Important risks’ section of our website highlights the key and other risks of structured products, in addition to explaining important information for Professional Advisers who wish to access the current products area of our website and who may use our structured product plans with their clients:**
 - www.tempo-sp.com/home/important-risks

- **Professional Advisers should access and read the relevant plan documents relating to any structured product plan of interest, in particular: the plan brochure; plan application pack, including, the terms and conditions of the plan; and the issuer’s securities prospectus, final terms sheet and key information document (KID), before making a recommendation to their clients**

- **Professional advisers should not invest in, or advise their clients to invest in, any investment product unless they and their clients understand them, in particular the relevant risks**

Important notice

This document is a financial promotion issued by Tempo Structured Products and approved by TIME Investments.

This document is intended only to be presented to, and used by, FCA authorised persons, including financial advisory firms and wealth managers ('professional advisers'). It is not suitable for, and must not be distributed to, clients or potential clients of any recipient.

No investment, legal, tax recommendation or advice of any type and no suggestion of suitability of any investment for any prospective investor is given or implied in this document. The information in this document does not take account of the investment objectives, particular needs or financial situation of any client or potential client of any professional adviser to whom this document is distributed. There are risks associated with an investment in any structured product.

This document is for your information only and is not intended as an offer, or recommendation or solicitation of an offer to buy or sell any investment, security, financial instrument or other specific product, to conclude a transaction, or to provide any investment service or investment advice, or to provide any research, investment research or investment recommendation, in any jurisdiction.

By accepting this document you will be taken to have represented, warranted and undertaken that: (i) you are a professional adviser (as referred to above); (ii) that you have read, agree to and will comply with the contents of this notice; (iii) you will conduct your own analysis or other verification of the data set out in this document and will bear the responsibility for all or any costs incurred in doing so; and (iv) that you are not accessing and accepting this document from any jurisdiction other than the United Kingdom, in compliance with all laws and regulations applicable to such access and acceptance.
