PRIIPs SRI	4		

Product description

Strike	100%	Barrier type	European
Zero coupon bond	100%	Num of AC points	8
Downside gearing	100%	Date of first AC point	24 Aug 2021
Barrier	60%	First AC level - return	100 - 132.25

Potential Returns:

This product is classified by FVC as a 'Growth Autocall'.

If the FTSE 100 Fixed Dividend Equal Weight Custom Index is at or above the required target level on any of the observation dates, the product will pay a fixed return and mature early, returning the initial investment in addition to a fixed return. The first autocall opportunity is after 3 years.

If for example, at the first autocall observation point (after 3 years) the FTSE 100 Fixed Dividend Equal Weight Custom Index is at or above its strike level, the product will be called and make a final payment of 132.25% (including capital investment). If the product is not called at the first two opportunities but on the third autocall date, the FTSE 100 Fixed Dividend Equal Weight Custom Index is at or above its strike level, the product will be called and make a final payment of 153.75% (including capital investment).

The full autocall schedule for this product is shown in figure 4.

Capital Repayment:

The product has a European barrier. This means that the barrier is observed at maturity only. The barrier is set at 60% of the strike level and will be breached if the final level of the underlying asset is below 60% of the strike level. If the FTSE 100 Fixed Dividend Equal Weight Custom Index finishes below the European barrier of 60% on the final day of the investment some capital is lost.

If the product has not been called on any of the observation dates, the investor will not receive any additional returns and the repayment of capital will depend on whether or not the final level of the FTSE 100 Fixed Dividend Equal Weight Custom Index is below the barrier level. If the FTSE 100 Fixed Dividend Equal Weight Custom Index finishes between the barrier level and the final autocall level, the investor will be repaid 100% of their initial investment.

If the underlying asset finishes below the 60% barrier, the investor will be paid an amount equal to the final level of the underlying asset, with respect to its strike level. For example, if the final level of the FTSE 100 Fixed Dividend Equal Weight Custom Index is 40% of its strike level and therefore the barrier is breached, the investor will be returned 40% of their capital investment.

Figure 1 : Statistics

This figure shows some key statistics of the product and compares them to averages of other open products in the market. Full details of the methodology can be found [here](#)

The overall, price and return scores are expressed on a scale of 0-10 with 10 representing the most favourable. The price score is derived from our estimate of value for money while the return score gives an indication of risk-adjusted return prospects. The overall score is the average of the price and risk scores.

The riskmap is expressed on a scale of 0 to 10, where 0 represents lowest risk and 10 the highest. It is calculated from contributions from market risk and credit risk which are shown separately. The maturity and duration (expected maturity) are also stated.

	This product	All products	All At risk
Overall score	7.28	7.81	7.67
Price score	6.1	7.36	7.13
Return score	8.46	8.26	8.21
Riskmap (0-10 scale)	5	3.66	3.93
Market riskmap	4.73	3.35	3.63
Credit riskmap	0.28	0.31	0.29
Maturity	10	7.17	7.43
Duration	5.19	3.93	3.9

Figure 2 : Payoff chart

This chart shows a sample of simulated outcomes of the final underlying value and the product payoff for the structured product to help identify the risk and return prospects of the investment.

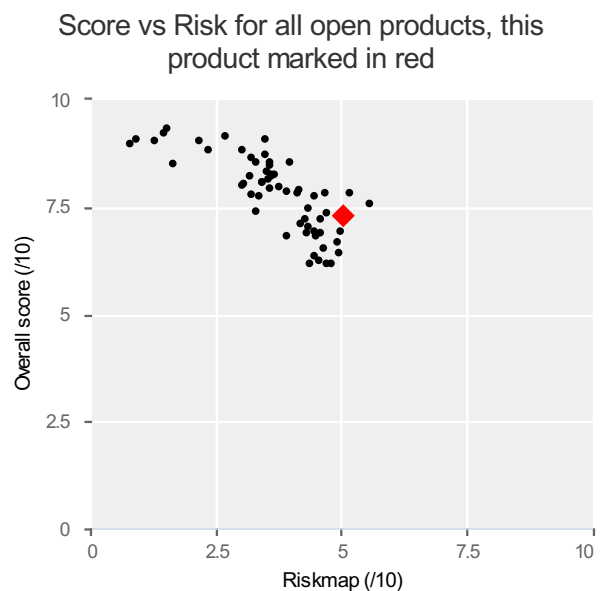

Figure 3 : Comparison chart

This chart plots the riskmap and overall score for all products on report centre, which shows all products listed on this site which are open for investment. The current product is shown with a red marker.

Breakdown of results and outcomes

Figure 4 : Investor results summary

Summary of possible product performances. Calculations from forward looking simulation and 10 year historical backtest (market risk only). This table shows a number of mutually exclusive outcomes of product performance classifications and associated statistics.

Result	Investment length (years)	Average payoff (%)	Simulated probability (%)
Autocall on 24 Aug 2021 if at or above 100%	3.00	132.25	53.49
Autocall on 24 Aug 2022 if at or above 100%	4.00	143.00	8.95
Autocall on 24 Aug 2023 if at or above 100%	5.00	153.75	4.90
Autocall on 27 Aug 2024 if at or above 100%	6.00	164.50	3.94
Autocall on 26 Aug 2025 if at or above 100%	7.00	175.25	2.73
Autocall on 24 Aug 2026 if at or above 100%	8.00	186.00	1.59
Autocall on 24 Aug 2027 if at or above 100%	9.00	196.75	1.36
Autocall on 24 Aug 2028 if at or above 100%	10.00	207.50	1.26
Full capital return	10.00	100.00	10.27
Capital loss	10.00	41.63	11.51

Figure 5 : Prospects for return of capital

This figure shows prospects for return of capital, calculating whether the return might be greater than, equal to or lower than capital invested. This is measured as probabilities from forward looking simulations.

Outcome	Simulated probability
Return less than capital	11.51
Return exactly capital	10.27
Return more than capital	78.22

Figure 6 : Charts of product outcomes (annualised and simple returns)

Charts of distribution of structured product returns based on forward looking simulation.

These two charts illustrate the probabilities of return. The first chart shows the annualised return of the product in 2.5% buckets. The second chart shows the simple return of the product. Both of these charts are market risk only.

Disclaimer:

This report has been compiled by Future Value Consultants (FVC), a UK based structured products specialist. The analysis presented here is based on the prospectus, brochure or other literature made available to FVC. This research is aimed at financial professionals only as part of their product evaluation process. This research is not intended for investors in any jurisdiction nor is it a recommendation to buy or sell securities.

The scores and assessments made are based on an objective, consistent, standardised methodology developed by FVC using its own pricing models and methods and independently sourced data. The factual information is prepared in good faith by FVC. However no recommendation of any investment is made or implied and the user should draw their own conclusions and take account of the needs of any individual investor.

About Structured Edge

Structured Edge is the structured product research service from FVC. As well as all the latest product research it has a searchable database, comparison tools, rankings, news and education. It can be accessed at www.structurededge.co.uk
